Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,6,7,10,17,18,44 are rejected under 35 U.S.C. 102(b) as being anticipated by Perfido et al. Figure 1 shows a process for recovering crumb rubber including fiber removal step 5, metal removal step 6, cryogenic cooling 7, grinding 8, and separation 9.

Claim Rejections - 35 USC § 103

Claims 4,5,8,9,11-16,20-43,45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Perfido et al. The remaining limitations of these claims would have been obvious design choices only as they solve no stated problems. For example, varying speed of grinding members is well known in the art to control particle size and of no patentable merit. If applicant believes that patentable subject matter is found in these claims, the patentable subject matter should be specifically referred to in arguing the rejection.

Response to Arguments

Applicant's arguments filed 8/22/06 have been fully considered but they are not persuasive. Applicant has misinterpreted the examiner's rejection. As noted above and

in the previous office action, the steps labeled 5,6,7,8, and 9 meet the claimed subject matter of the claims rejected under 35 USC 102. The particles subsequent the comminution step 4 of the patent are considered to be granulated particles by the examiner. The patent states that the particles cannot be greater than $\frac{1}{4}$ inch diameter which includes applicant's range definition of granulated particles i.e. less than .0236 inch. Particles less than .0236 inch are found in particles less than $\frac{1}{4}$ inch. It is also noted that the dependent claims have not been separately argued such that their patentability falls or stands with the parent claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
